## CAREER OBJECTIVE

Computer Science graduate with hands-on experience in software development, backend technologies, APIs, databases, cloud, and modern development practices. Seeking an entry-level software engineering role to build reliable solutions, solve technical problems, and contribute effectively in a collaborative team.

## SKILLS

**Programming Languages:** Java, Python, C

**Frontend:** React.js, HTML5, CSS, JavaScript

**Backend:** Spring Boot, Spring Framework, Hibernate, Spring Data JPA, REST APIs, Microservices

**Architecture & Messaging:** API Gateway, Eureka, OpenFeign, Resilience4j, Event-Driven Architecture, Apache Kafka, Design Patterns

**Databases:** SQL, MySQL, PostgreSQL, MongoDB, SQLite

**Cloud & DevOps:** AWS, Docker, CI/CD

**Testing & Tools:** JUnit, API Testing, Debugging, Git, GitHub, Maven, Postman

**Development Practices:** OOP, DSA, SDLC, Agile/Scrum, Code Reviews, Problem Solving

## WORK EXPERIENCE

**Java Full Stack Developer Intern, upGrad – Virtusa Training Program** Oct 2025 – Feb 2026

- Developed Java/Spring Boot REST APIs with database integration, applying OOP, debugging, testing, and clean-code practices.
- Built backend and microservices components using Spring Boot, Spring Cloud, Hibernate/JPA, SQL/MongoDB, Kafka, Docker, and Git.
- Worked in Agile/Scrum teams, participating in code reviews, technical discussions, and collaborative development.

**Java Full Stack Training – JSpiders**

May 2025 – Sep 2025

- Completed hands-on training in Core Java, OOP, Data Structures & Algorithms, Collections, Exception Handling, Multithreading, SQL, Spring Boot, Hibernate, and REST APIs.

## PROJECTS

**Investment Banking Deal Pipeline Management Portal** 🔗

**Tech Stack:** Java 17 | Spring Boot | Spring Security | Hibernate | MongoDB | REST APIs | Kafka | Docker | AWS | CI/CD

- Developed REST APIs for deal creation, approval, and processing workflows using Spring Boot, Hibernate, and MongoDB.
- Implemented JWT authentication, RBAC, and Kafka-based asynchronous workflows for secure, event-driven processing.
- Created JUnit tests achieving 80%+ backend test coverage and used CI/CD workflows for automated build, testing, and deployment.

**Banking Service – Microservices Banking System** 🔗

**Tech Stack:** Java 17 | Spring Boot | Spring Cloud | Eureka | API Gateway | OpenFeign | Resilience4j | MongoDB | Docker | AWS | CI/CD

- Developed three core microservices for Account, Transaction, and Notification using Java 17 and Spring Boot.
- Implemented Eureka service discovery, API Gateway, OpenFeign, and Resilience4j for scalable service communication and resilience.
- Containerized services with Docker and applied AWS and CI/CD practices for application deployment and delivery.

**SpendSense – AI Personal Finance Chatbot** 🔗

**Tech Stack:** Python, Generative AI/LLM APIs, Tkinter, SQLite, Speech Recognition, Text-to-Speech

- Developed a Python chatbot using LLM APIs for conversational personal-finance assistance.
- Implemented SQLite persistence, speech recognition, and text-to-speech functionality.

## EDUCATION

**Bachelor of Technology (Computer Science Engineering), Aditya College of Engineering**

84% 2025

**Intermediate (MPC), Narayana Jr College**

92% 2021

**SSC, St. John's EM High School**

89% 2019

## CERTIFICATIONS

**Java Full Stack Development Certification** 🔗 — Black Bucks Engineers

**What Is Generative AI? – LinkedIn Learning (Feb 2026)** 🔗

## ACHIEVEMENTS & LEADERSHIP

- 1st Place** — National Technical Symposium, MITS Madanapalle
- Anchor & Coordinator — College Technical and Cultural Events
